Podcasts and the Brain

By [Tarisa Reynolds](#)

February 28, 2021

There's something about listening to a podcast that makes one feel more intelligent than if they are simply watching television or listening to music. There is an air of sophistication that comes along with telling a friend about a great new podcast they've discovered. Over the past fifteen years, podcasts seem to have become the intellectual's form of entertainment. With wide ranges of topics from politics to comedy to the paranormal, there is something for everyone.

But does listening to podcasts really result in higher intelligence? Obviously listening to educational topics such as history and science will allow your brain the ability to grow, but how can other seemingly less educational topics help? Think of it like this, when you are listening to something you have to pay great attention which keeps your brain focused and working much in the same way that reading does.

However, there are drawbacks to being able to have an endless influx of information delivered to you instantly. With the ability to listen to podcasts
